Speed Device(s) Update For December 2025

Speed Indicator Device (SID)

The SID has been moved from Lovedean Lane to Catherington Lane (corner of Crouch Lane). The battery is changed fortnightly and the SID is moved monthly. The graphs from Catherington Lane (North) are attached.

Key data (w/c 15/12/2025) – Fastest speed recorded 60MPH 21/12/2025 @1330, 9 incidents of 55mph or more, 45% of vehicles are travelling at more than 30mph, 13% are travelling at more than 35mph. Highest number of speeders 0900-1000 and 1600-1700.

As Andy stated we have been successful with CIL funding for two further SIDs.

Community Speedwatch

SOB Speedwatch did a session on Havant Road (Near the Swale) which resulted in 5 speeders being caught. They will be receiving letters. I attended this session as an observer.

The January schedule for roadside sessions will be published shortly.

I have yet to hear more about the additional roadside locations I have submitted for consideration.

Auto Speedwatch Cameras – monthly update

The broken camera has been returned to the office. The other cameras on Southdowns and London Roads are still work but we are not verifying vehicles. In truth nothing much is being picked up as the cameras are low on battery most of the time.

When I have completed archiving our data and canned reports to a shared drive I will decommission the cameras. This needs to happen before our data connection drops in March.

.
