Speed Device(s) Update For November 2025

Speed Indicator Device (SID)

The SID has been moved from Rowlands Castle Road to Lovedean Lane. The battery is changed fortnightly and the SID is moved monthly. The graphs from Lovedean Lane are attached.

Key data – Fastest speed recorded 60MPH 19/11/2025 @0830, 35% of vehicles are travelling at more than 30mph, 9% are travelling at more than 35mph. Highest number of speeders 0900-1000 and 1700-1800.

Andy has been kind enough to include two additional SIDs in the bid for the £48k CIL money – we await the result. Worth noting RCPC operate 5 SIDs.

Community Speedwatch

SOB Speedwatch did a session on Catherington Lane which resulted in 14 speeders being caught. They will be receiving letters.

I attended the SOB Speedwatch AGM on 10th November. There was a discussion with Rowlands Castle about continuing or not with ASW cameras. Ian Middleton the outgoing Police co-ordinator for SOB Speedwatch supported our understanding of the police position on the ASW cameras. Rowlands Castle now know we are stopping but will continue themselves.

I have offered my services to SOB Speedwatch, I have registered as a team member, completed the H&S training and will attend my first session as an observer shortly. I should be on the roadside in January with the team.

The team co-ordinator has asked me to provide additional locations in Horndean for patrols. I have submitted Catherington Lane North and Southbound near the park, Lovedean Lane North and South Bound, Portsmouth Road at the Bridge and Five Heads Road (both directions) for consideration. This requires a number of data points on each location including What3words, a photo, direction of travel etc….there are H&S rules around locations eg. there must be a footpath

Speedwatch already have Southdowns Road, London Road, Havant Road, Catherington Lane (nr Kingscourt) and Rowlands Castle Road on their list.

Auto Speedwatch Cameras – monthly update

The broken camera has been returned to the office. The other cameras on Southdowns and London Roads are still work but we are not verifying vehicles. In truth nothing much is being picked up as the cameras are low on battery most of the time.

When I have completed archiving our data and canned reports to a shared drive I will decommission the cameras. This needs to happen before our data connection drops in March.

A post has been written and circulated for comment and is attached below….it has not been posted yet.
