HORNDEAN PARISH COUNCIL

MINUTES OF THE EXTRAORDINARY COUNCIL MEETING HELD AT JUBILEE HALL ON 7TH SEPTEMBER 2026 AT 6.30 P.M.

PRESENT: Councillors A Redding (Chairman), T Attlee, D Calderwood, P Beck, J lay, D Prosser, B Sowden and N Smith

IN ATTENDANCE: Becky White, Clerk, Rachel Cole, RFO & Sarah Guy, Deputy Clerk (Minute Taker)

PUBLIC ATTENDANCE: County Cllr Ian Young and 4x members of the public.

HPC 77/26/27 TO RECEIVE APOLOGIES FOR ABSENCE
Apologies were received from Cllr R Smith, Cllr A Dodsworth & District Cllrs D Evans, E Woodard & J Hogan.

HPC 78/26/27 TO RECEIVE ANY DECLARATIONS OF INTEREST
Cllr A Redding declared a personal interest in Agenda Item 9 in relation to the Green Trail & Heritage Network, due to his involvement in the project as the lead Councillor.

HPC 79/26/27 PUBLIC QUESTION TIME
The meeting was duly opened to members of the public.

HPC 80/26/27 TO RECEIVE A WRITTEN UPDATE FROM COUNTY COUNCILLOR I YOUNG REGARDING HAMPSHIRE COUNTY COUNCIL MATTERS.
It was agreed that Agenda item 12 be brought forward on the agenda.
County Cllr I Young provided a report to the meeting which is attached as Appendix 1 to the minutes. This was noted.

HPC 81/26/27 TO APPROVE THE MINUTES OF THE EXTRAORDINARY COUNCIL MEETING HELD ON 3RD AUGUST 2026.
It was **RESOLVED** that the minutes of the Extraordinary Council meeting held on 3rd August 2026 be signed by the Chair as a true record of the meeting.

HPC 82/26/27 TO RECEIVE A REPORT ON THE CHANGES TO THE NATIONAL PLANNING POLICY FRAMEWORK AND THE POTENTIAL IMPACTS ON HORNDEAN PARISH FROM CLLR T ATTLEE.
Cllr T Attlee, a member of HPC's Planning Committee, gave an overview of the key changes to the National Planning Policy Framework and the potential impacts on development within the parish. Her report is attached as Appendix 2 to the minutes.

HPC 83/26/27 TO APPOINT CLLRS D CALDERWOOD AND CLLR A DODSWORTH TO THE NEIGHBOURHOOD PLAN WORKING PARTY.
Newly co-opted Cllrs Calderwood and Dodsworth had expressed their interest in joining the Neighbourhood Plan Working Party. They had attended a meeting of the group, convened to discuss the Council's decision to move forward with a full Neighbourhood Plan (Minute HPC

56/26/27 refers). The group recognised that HPC will need additional Cllrs to spread the work, contribute to evolving the Steering Group and assist in completing the Plan at speed.

It was **RESOLVED** that Cllrs D Calderwood and A Dodsworth be appointed to the Neighbourhood Plan Working Party. This motion was proposed by Cllr Beck and seconded by Cllr N Smith.

HPC 84/26/27 TO ALLOCATE NEIGHBOURHOOD COMMUNITY INFRASTRUCTURE LEVY [CIL] FUNDING TO THE DEVELOPMENT OF A NEIGHBOURHOOD PLAN FOR HORNDEAN PARISH TO A NEW EARMARKED RESERVE AND DELEGATE AUTHORITY TO SPEND TO THE CLERK.

Council's reasoning for deciding to move forward with a full NBH Plan was to meet the challenges of the parish's inclusion in the new South East Hampshire Unitary Authority. The Plan must develop the community's ownership of parish's place identity through HPC, retain the character of the area and seek to protect the vulnerable land corridors and settlement gaps. This means that HPC must work, along with our consultant, stakeholders and residents, at pace, aiming to get to referendum stage in approximately 18 months. In planning for the 2026/27 budget, it had already been agreed to move £17,000 from surplus revenue reserves to a Neighbourhood CIL Earmarked Reserve. Places4People, the consultancy engaged, had provided an overview of the work required and advised costings in the region of £25,000. The Clerk had received confirmation from EHDC that Neighbourhood CIL [NCIL] can be used to fund the work and recommended that the reserve is topped up by NCIL to a level of £25,000 and authority to spend delegated to the Clerk in agreement with the Working Party [WP]. This would allow the WP to move forward quickly to make progress with the consultant attending the November 2026 Council meeting in order to give an update.

It was **RESOLVED** that £25,000 be moved from the CIL Earmarked Reserve to a new Neighbourhood Plan reserve with authority to spend from the NBH Plan reserve delegated to the Clerk with the agreement of the Working Party. This motion was proposed by Cllr Sowden and seconded by Cllr Beck.

HPC 85/26/27 TO RECEIVE A REPORT ON THE MUGA & GYM EQUIPMENT PROJECT AT JUBILEE FIELD AND CONSIDER ADDITIONAL NEIGHBOURHOOD CIL FUNDING TO ENHANCE COLD WEATHER PLAY VALUE.

The Clerk reported that the new equipment had been completely installed, all snagging issues dealt with promptly and had resulted in a noticeable uplift in park users. EHDC awarded £95,000 towards costs from their Strategic CIL fund; the total cost of the MUGA & Gym Equipment came to £94,851 exc. VAT. £94,000 has already been drawn down from EHDC and HPC will submit the final invoice for £851 with the project completion report. The DDA compliant pathway, including the dropped kerb and newly marked disabled bay, were funded directly by HPC. Although £8,500 in Neighbourhood CIL funding was originally earmarked for this project, supplier discounts and an improved approach has meant that HPC's NCIL outlay is only £3,000. The equipment suppliers, Play Innovation, have provided a quotation for two additional games which will enhance the MUGA's play value, particularly considering that some areas of the park flood during the winter months. The quotation is attached to this report for reference.

It was **RESOLVED** that Council proceed with the quotation from Play Innovation for the 2x additional MUGA games at a cost of £9,802 + VAT. £5,500 from HPC's Neighbourhood CIL will go towards the cost. This motion was proposed by Cllr Beck and seconded by Cllr Prosser.

HPC 86/26/27 TO RECEIVE AND CONSIDER A REPORT FROM THE CLERK ON THE HORNDEAN GREEN TRAIL & HERITAGE NETWORK AND DETERMINE NEXT STEPS.

A local resident, raising concerns regarding the Horndean Green Trail and Heritage Network project, had requested a formal response from Council. The Clerk had researched and examined each issue and a report had been circulated to all and included in the public meeting pack. The conclusion of the report noted the Clerk's advice that the Council had developed this project using appropriate levels of expertise, local consultation and publicity. External grant funding had been used to great effect to deliver the HGT&HN at best possible value and showcase the parish's rich history and landscape to both residents and visitors. Although the report also noted that there were

opportunities to enhance and improve the project going forwards in terms of communication, consultation and use of local materials, the resident's request to redesign or replace items now installed was not considered to represent a proportionate or economic response given that the overwhelming community reaction had been positive.

It was **RESOLVED** to formally acknowledge the resident's concerns and accept the Clerk's report as the Council's response, noting that opportunities would be taken to incorporate the feedback into future extensions to the trail network. This motion was proposed by Cllr Beck and seconded by Cllr Lay. Cllr Redding abstained from the vote.

HPC 87/26/27 TO CONSIDER ARRANGEMENTS FOR THE COUNCIL'S INSURANCE COVER FOR 2026/27 (RENEWAL DATE 1ST OCTOBER) AND DELEGATE AUTHORITY TO DETERMINE TO THE RESPONSIBLE FINANCE OFFICER [RFO].

HPC's overall insurance cover was due for renewal on 1st October 2026 and the Parish Council is currently insured through Zurich Municipal. The renewal quote provided by Zurich was £10,913 however the RFO has approached a broker who is in the process of obtaining other quotes to make sure this is comparable. It is requested that authority is delegated to the RFO to decide the appropriate policy upon renewal as this will be required before the next Full Council meeting.

It was **RESOLVED** to delegate authority to the RFO to finalise the Council's insurance arrangements for 2026/27 and to obtain comparable cover quotations. This motion was proposed by Cllr Lay and seconded by Cllr Beck.

HPC 88/26/27 TO CONSIDER ARRANGEMENTS FOR THE LINCFEST MEMORIAL YOUTH FUND, INCLUDING THE CREATION OF AN EARMARKED RESERVE AND DELEGATE SPENDING AUTHORITY TO THE CLERK WITH THE APPROVAL OF THE FUND PANEL.

HPC has now received £12,381.50 in funds from LincFest 2026. The Clerk had taken advice on this from the Society of Local Council Clerks and confirmed that it is acceptable for the Council to hold this money on behalf of the LincFest Funding Panel. The Panel's first meeting would be on 1st October 2026 to determine what kind of youth projects would be supported and how the fund might be distributed. In order to keep this funding separate and distinct, the Council will need to resolve to create an Earmarked Reserve (revenue) and delegate authority to the Clerk to spend with the agreement of the panel. Going forward, as it's likely that LincFest will become an important annual event, the organisers will be encouraged to develop a more formal organisation with its own bank accounts so that the Youth Fund can be managed independently from the Council.

It was **RESOLVED** to create an Earmarked Reserve for the LincFest Fund 2026 and delegate authority to spend to the Clerk with the agreement of the Funding Panel. This motion was proposed by Cllr Prosser and seconded by Cllr N Smith.

HPC 89/26/27 TO RECEIVE A WRITTEN UPDATE FROM DISTRICT COUNCILLORS REGARDING EAST HAMPSHIRE DISTRICT COUNCIL MATTERS.

District Cllr D Evans provided a report to the meeting which is attached as Appendix 3 to the minutes. Cllrs J Hogan and E Woodard provided a joint report, which is attached as Appendix 4 to the minutes. This was noted.

HPC 90/26/27 TO NOTE THE OFFICERS REPORT

The Clerk and Deputy Clerk had provided an update to meeting on various issues which had progressed over the summer period. This report is attached as Appendix 5 to the minutes and was noted.

HPC 91/26/27 TO RECEIVE AN UPDATE FROM MEMBERS REPRESENTING THE PARISH COUNCIL WITHIN EXTERNAL ORGANISATIONS AND WORKING PARTIES.

Hayling Island Residents Association: A meeting has been scheduled for 5 October, which will be attended by Cllr Lay and the Clerk, Becky White.

Neighbourhood Watch: No meeting dates have been advertised, so there are no updates to report.
Armed Forces Stakeholders Group: Cllr Redding recently attended a meeting of the Armed Forces Stakeholders Group. The Veteran's Festival is scheduled to take place on Saturday, 19 September 2026, at Petersfield Festival Hall.
Community Parish Network: Cllr Redding recently attended a meeting alongside local community groups. He reported that the meeting provided a valuable insight into what is happening within the community. Jo Utting at EHDC coordinates these meetings and plays an integral role in bringing the group together.
HGTHN: Cllr Redding provided an update regarding the proposed gateway installation at Dell Piece West, noting that progress had been delayed due to an impasse with Hampshire County Council (HCC) concerning the matter.
South Downs National Park Authority: A grant funding application has been submitted for the Quiet Lanes Initiative.
Twinning Association: Cllr Beck provided an update, informing members that Horndean Parish Council will be hosting a meet-and-greet with members of Aubergenville Twinning Association at Jubilee Hall on 2 October from 4:30pm.

HPC 92/26/27 TO RECEIVE AND CONSIDER THE RFO'S REPORT ON THE COUNCIL'S ACCOUNTS TO 31ST JULY 2026, INCLUDING ITEMS OF NON-BUDGETED EXPENDITURE AS LISTED AND DETERMINE NEXT STEPS:

Required Tree Works: The 2026 tree survey has identified a number required tree works as part of our ongoing maintenance strategy, including removal of deadwood, crown reductions, monolith reductions and felling. The Grounds Manager has received three quotes and whilst the works can be likely accommodated within the existing budget (£7165 of a £12,000 budget remaining), any further works will take us over budget and impact our revenue reserves.
Inspection by the Grounds Team has also flagged up a dead oak tree and 15-20 ash trees suffering significant dieback at Yoells Copse. After an onsite meeting with Adele Poulton, an EHDC Arboricultural Officer, it has been agreed that HPC can and should fell these trees under 'Dead or Dangerous' conditions, meaning that a TPO application is not required. The oak tree, because of its location and condition, has already been actioned for immediate removal and the cost of £2,100 for emergency works has been included in the budget figure shown above. The Grounds Manager is obtaining quotes for the removal of the affected ash stock but early indications show that this work will cost in the region of £12-15,000. The Clerk has taken advice from the CIL officer at EHDC and Neighbourhood CIL can be used for the management of green infrastructure.

It was **RESOLVED** that Council ringfencing £15,000 from the existing NCIL reserve for these works in 2026/27and as part of the budgeting process for 2027/28, evaluate how use of NCIL might support the Council in managing the tree stock without putting undue pressure on the budget's revenue requirement
which must be raised through the precept.

Additional Bin at Jubilee Field Car Park: An uplift in numbers of people using the Jubilee Field Park facilities has led to a corresponding increase in litter. To alleviate this, the team has suggested adding an additional large waste bin to our contract with Veolia. This might take us slightly over budget (£5,704 for 2026/27) but we are hopeful that the additional cost of the bin will be offset by a reduction in the excess weight charges we are currently subject to when the existing bins are overfull. This will be monitored and an update given if required.

HPC 93/26/27 TO RECEIVE AND APPROVE THE ORDERS FOR PAYMENT FROM 1ST JUNE TO 31ST JULY 2026

The Orders for Payment as listed had been previously circulated (attached as Appendix 6 to the minutes). It was **RESOLVED** that the Orders for Payment from 1st June to 31st July 2026 as listed be approved.

HPC 94/26/27 TO RECEIVE AND NOTE THE SPEEDING DATA REPORT FROM JULY & AUGUST 2026

Cllr Prosser had circulated his speeding data reports for July and August prior to the meeting, The reports were noted (reports attached as Appendix 7 to the minutes).

HPC 95/26/27 TO RESOLVE TO EXCLUDE THE PUBLIC AND THE PRESS, IN THE VIEW THAT PUBLICITY WOULD PREJUDICE THE PUBLIC INTEREST BY REASON OF THE CONFIDENTIAL NATURE OF THE BUSINESS OR ARISING OUT OF THE BUSINESS ABOUT TO BE TRANSACTED. (PUBLIC BODIES (ADMISSION TO MEETINGS) ACT 1960

It was **RESOLVED** to exclude the public from the meeting. Members of the public left the meeting and a short recess took place.

The public meeting concluded at 9.12pm

HPC 96/26/27 TO RECEIVE AND CONSIDER 'HEADS OF TERMS IN RESPECT OF A DEED OF EASEMENT FOR SERVICE MEDIA OVER HPC LAND AT CATHERINGTON LITH AND STUBBINS DOWN

It was **RESOLVED** that Council approved the Deed of Easement for Service Media over HPC land at Catherington Lith and Stubbins Down and authorised the Clerk to proceed with the signing of the Easement without the matter being required to return to Council.

HPC 97/26/27 TO RECEIVE AND CONSIDER AN UPDATE FROM THE CLERK IN RESPECT OF GROUNDS TEAM STAFFING

It was noted that the Grounds Manager had given notice, with his last working day being 2 October 2026. It was agreed that a job advertisement would be published as soon as possible.

The confidential meeting concluded at 9.31pm

Appendix 1

County Councillor Report for Horndean Parish Council meeting 7.9.26

1. Since the HPC meeting on 6th July, I have attended various Hampshire CC briefings including for highways, flooding, school admissions and planning.
2. **Hampshire and the Solent Combined Authority**
   Work is continuing to establish the governance arrangements for the Hampshire and the Solent Combined Authority. The first Board meeting was held on 13th July and briefings for setting up the Committees of the Combined Authority will start shortly. The Authority will be chaired by the Hampshire and Solent Mayor when elected, currently due in May 2028 but there is a proposal to bring this forward to 2027.
   Local Government Reorganisation
   Similarly, the LGR Joint Committees are being established for each of the four proposed new Unitary Authority (UA) council areas in Hampshire, including the South East Hampshire Joint Committee. A Judicial Review has been launched to challenge the UA solution chosen by the government. Meanwhile preparations for the new UAs are proceeding for the chosen solution.
3. A further meeting of the Havant Thicket Reservoir (HTR) Stakeholder Advisory Group was held on 15th July, when access to the future HTR site and engagement with our local schools was again discussed. I am due to hold an on-site meeting with HCC Officers to review future site access arrangements on 9th September.
4. Making full use of the reporting facility on the HCC website (Report | Hampshire County Council) or using the OurHants App, continues to be the preferred method for reporting local issues. Specific links for different issues are below.
5. A new joint Hampshire Minerals and Waste Plan was adopted at the full HCC meeting held on 16th July and has also been adopted by other local authorities involved. This Plan will probably need to be referenced in developing the Horndean Neighbourhood Plan. A brief HCC guide to Neighbourhood Plans can be found here NeighbourhoodPlanningSummary.pdf .
6. HCC has carried out some necessary local maintenance recently including extensive road surface patching repairs to Merchistoun Road and some clearance of the Swale drainage ditch and retention basin on Havant Road.
7. The traffic delays due to ongoing roadworks near the LEOH development have put pressure on alternative routes, notably Rowlands Castle Road where heavy traffic, often speeding has been a concerning issue recently. I have raised the need to keep traffic flowing near their development as best possible with Bloor Homes and have again raised the speeding issues with the local police.
8. Congratulations to Horndean Technology College pupils on their recent achievements. HTC achieved an overall GCSE pass rate (grades 9–4) of 75%, outperforming the national average of 67.3%. Year 10 pupils also collected early-entry exam results for two Level 2 vocational qualifications. Results reflect

continued progress across core subjects like English, Mathematics, and Science, alongside a wide range of additional academic and vocational options.

9. The HCC Councillor grant scheme is now open for application for grants up to £1000. I have recently visited two charities providing services in our area, Home Start Butser (support to young families) and Off The Record (support to young people) and they are considering applying for grants for projects in Horndean.

Ian Young

Councillor, Catherington Division

CONFIDENTIAL

NATIONAL POLICY PLANNING FRAMEWORK (NPPF) AUGUST 2026

https://assets.publishing.service.gov.uk/media/6a8334c03bd75b81e2329ac4/National_Planning_Policy_Framework.pdf

SOME IMPLICATIONS FOR HORNDEAN PARISH COUNCIL
Report prepared by Cllr Teresa Attlee

Introduction and Background

1. The NPPF sets out the Government's planning policies for England and how they are expected to be applied, alongside the presumption in favour of sustainable development. It was first published in March 2012 and has been revised repeatedly since - most substantially in July 2018, February 2019, July 2021, September 2023 and December 2023.
2. The current Government's central housing ambition - building 1.5 million homes across this Parliament - has driven two significant revisions since it took office: December 2024 (an initial reversal of the previous government's late-2023 relaxations) and now August 2026 (a full structural rewrite following a further consultation).
3. The NPPF 2024 included;
   - Mandatory housing targets for principal authorities to drive housebuilding, with increased targets in areas facing the highest levels of unaffordability.
   - Measures to ensure that principal authorities develop or update local plans that cater to the needs of their communities.
   - Principal authorities to identify and prioritise lower-quality grey belt land to meet housing targets.
   - Increased emphasis on affordable housing, particularly social rent.
   - The tilted balance.
4. The Government's stated intention in producing an updated NPPF 2026 was to remove ambiguity and subjective judgement from planning decisions by converting many previously discretionary paragraphs into clearer, more binary coded policies - reducing scope for dispute and speeding up decision-making and appeals.
5. The August 2026 NPPF is not a routine refresh of the December 2024 NPPF. It changes the route to a planning decision, separates plan-making policy from

national decision-making policy and introduces a large number of new tests, definitions and annexes.

Purpose of the Planning System

6. The new NPPF 2026 sets out that the purpose of the planning system is about managing the use and development of land in the long-term public interest. There are three stated objectives; economic, social and environmental that are to be delivered through development plans and the application of the policies in the NPPF. Development Plans include Local Plans, and they may additionally include Neighbourhood plans.

EHDC Local Plan

7. A local plan sets out housing figures, development sites, local infrastructure and planning policies in East Hampshire. Through local plans communities shape decisions about how to deliver the housing and wider development their area needs.
8. EHDC's extant local plan is the **Joint Core Strategy (JCS)**, adopted by East Hampshire District Council on 8 May 2014. It sits alongside various saved policies that the HPC planning committee refers to, such as CP27 Pollution and Neighbourhood Amenity, and CP29 Design and Character when reviewing planning applications. Within the National Park, the JCS has been superseded by the separate South Downs Local Plan (adopted July 2019).
9. The JCS is now over a decade old and significantly undershoots East Hampshire's latest housing need at 1,124 dwellings per annum which is more than double the JCS figure. The lack of an up-to-date Local Plan and a shortage of deliverable houses has triggered a term we may all have heard of "the tilted balance".

The Tilted Balance

10. The tilted balance was planning shorthand for a former national policy test when local authorities were considering planning applications. Where the policies most important for deciding the proposal were out of date, national policy tilted the balance towards permission unless specified protections applied or the adverse impacts significantly and demonstrably outweighed the benefits.
11. Until August 2026 the policy was located at paragraph 11 of the National Planning Policy Framework which applied two tests for when the policies counted as out of date; either of two situations: the Local Planning Authority [LPA], (East Hampshire District Council is Horndean's LPA) could not show a five-year supply of deliverable housing land or its housing delivery was less than 75%

of what was needed over the previous three years, measured by the national Housing Delivery Test.

12. In the case of EHDC its Housing Delivery Test was 88%, but its five-year supply fell short by a long way at 2.9 years, and its Local Plan was out of date.
13. In August 2026 the Government rebuilt the National Planning Policy Framework and, amongst other things, removed the tilted balance in that form, replacing it with new tests (explained below at Chapter 4).
14. However, As EHDC does not have an up-to-date Local Plan a lot of decisions about development in and around Horndean over the next couple of years will be shaped more by the NPPF than by any current local plan policy.

EHDC Statement

15. In May 2026, ahead of the revised NPPF in August 2026, Cllr Richard Millard, EHDC Leader, said:
16. *"We believe in the principle of plan-making, but repeated Government changes to planning rules have torn the heart out of our local plan.*
17. *"Even if we produced a plan by the deadline of 31 December 2026, there will be so many new rules between now and then that it would be rendered pointless.*
18. *"In May, we took the decisive step of informing the Government that we would refocus our planning work on the new council area that is due to be established in 2028".*
19. *"Putting together a local plan is hugely costly and requires hundreds of thousands of pounds to engage expert consultants to advise on transport, utilities and more. Spending that amount of taxpayers' money on a document that would be of little use once completed is totally unjustifiable.*
20. *"In 2028 East Hampshire will cease to exist as an administrative entity, we should be looking ahead to the future of planning in the context of the new unitary authorities."*
21. *The Government set a deadline to submit our local plan by the end of December but also set new rules for making local plans and intends to change national planning policy (through an updated National Planning Policy Framework) in the summer, just months before the deadline".*
22. On 24 July Cllr Millard sent out another statement that included
23. *"We have repeatedly called on the Government to provide greater clarity on how councils going through Local Government Reorganisation are expected to prepare plans for existing boundaries that will soon cease to exist, using guidance that is likely to become outdated. We are still awaiting that clarification.*

24. *"It is therefore not surprising that other councils are reaching similar conclusions. I am pleased to see that others are choosing to focus their energies on the new unitary, rather than persist with the legacy planning system, which would mean continuing to invest time and resources in plans that may become quickly obsolete."*

Local Government Review

25. The results of the Local Government Review were announced on 25 March 2026. EHDC will be split between two new unitary authorities of Mid Hants and South East Hants. Horndean, Clanfield and Rowlands Castle will be joining the new South East Hants unitary.
26. Shadow elections are expected May 2027, and vesting day is 1 April 2028, when the new unitary formally takes over all legal powers. Hampshire County Council is pursuing a judicial review of the decision, so this timeline carries some risk of delay.

.

Appendix

NPPF August 2026 – Chapter by Chapter Overview

1. On 17 August 2026, the government published a substantially rewritten version of the NPPF. The whole document has been reorganised around a new system of numbered "policy codes" rather than the old style of numbered paragraphs.
2. The new framework has explicitly moved to a "rules-based" system, splitting policy for the first time into distinct plan-making and decision-making sections.,
3. It was revised again because Ministers judged that even the new 2024 system remained "too slow, uncertain and inconsistent," with too much scope for local discretion and legal challenge to hold back development.
4. It derives legal force from Section 38(6) of the 2004 Act, which requires planning decisions be made in accordance with the development plan unless material considerations indicate otherwise - the NPPF being the most important such consideration. Because it is policy rather than statute, government can rewrite it without new legislation, explaining its frequent revisions as noted above.

What It Means for Horndean

5. Every planning application that comes in for the parish from 17 August 2026 onward — whether inside the village or in the wider countryside, is judged against this new document immediately. There's no transition period. Even though EHDC's own plan is on hold, the national rules apply from day one.

6. It is the backdrop against which the parish's own Parish Design Statement update and forthcoming Neighbourhood Plan will have to operate. Neither document can contradict this national framework, but both can add genuinely local detail within it.

Chapter 1: Introduction

7. This opening chapter explains what the NPPF is for and how it should be used. It confirms that the "national decision-making policies", the rules used to decide individual planning applications, took legal effect as soon as the document was published, regardless of when an application was submitted or when a council's own plan was adopted.

What It Means for Horndean

8. In simple terms: even a planning application submitted back in 2024, if it's still being decided today, is now tested against these new 2026 rules so applicants and objectors alike need to re-check their arguments against the new document.

Chapter 2: Plan-Making Policies (coded PM1 to PM17)

9. This chapter sets out how LPAs are supposed to go about preparing a Local Plan — the document that's meant to set out, area by area, where development should and shouldn't happen. Under the new system, LPAs must follow a fixed timetable: once they formally start the process (called "Gateway 1"), they have 30 months to get their plan adopted. There are two further checkpoints along the way, called Gateway 2 and Gateway 3.
10. One important new rule (PM6) says a LPAs Local Plan cannot simply copy out the national rules and restate them as if they were local policy; it must add genuinely local details, not duplicate what national policy already says.

What It Means for Horndean

11. This chapter that governs how EHDC will now have to prepare its next Local Plan, and how any Horndean Neighbourhood Plan must be prepared. As noted, EHDC's existing plan (the 2014 Joint Core Strategy) is out of date and EHDC has paused starting the Gateway 1 process.

Chapter 3: Decision-Making Policies (coded DM1 to DM10)

12. This is a more technical, procedural chapter. It covers things like how planning applications should be validated, how planning conditions and financial contributions (like Section 106 agreements) should be used, how LPAs enforce against breaches, and when permitted development rights can be removed for a particular area.

Chapter 4: Achieving Sustainable Development (coded S1 to S6)

13. This is the most important chapter for understanding how development decisions get made in 2026.
14. Under the old (2024) NPPF, one of the key questions decision-makers asked was: "Can the Council show a five-year housing land supply?" If the answer was no, a strongly pro-development "tilted balance" kicked in across the district.
15. The new NPPF asks a completely different first question: is the site inside a settlement, or outside one? Settlement is defined in the Glossary at Annex B
16. Principle of Development Within the Settlement Boundary. If a site is inside a settlement (Policy S4), it should be approved *"unless the benefits of doing so would be substantially outweighed by any adverse impacts when assessed against the national decision-making policies in this Framework"*.
17. The "substantially outweighed" test applies whether or not the LPA has a five-year land supply, a high Housing Delivery Test score, and regardless of whether the local plan is out of date.
18. Principle of Development Outside the Settlement Boundary. If a site is outside a settlement (Policy S5), the starting position is much more restrictive. Only development that fits into a specific closed list of categories is supported such as agricultural buildings, redevelopment of previously developed land, small-scale infilling within an existing group of houses, rural exception affordable housing, or development near a well-connected railway station.
19. However, one important category on that list is S5(1)(j). This brings in development proposals which would address an "unmet need" including the provision of housing where the local planning authority cannot demonstrate a five-year land supply of deliverable housing sites or scores below 75% in the most recent Housing Delivery Test.
20. These types of proposals must be "physically well-related to an existing settlement" and be accommodated taking into account existing or proposed infrastructure. Where a development proposal is located outside the settlement and separated from the existing built-up area by being beyond the outside edge of an allocated site that has yet to be fully developed it may not be suitable anyway.
21. In all cases proposals would not be allowed if the benefits would be substantially outweighed by adverse effects.

What It Means for Horndean

22. This is the single most consequential chapter for the parish, because it explains why the physical line of the Settlement Policy Boundary now matters more than ever. Proposals within the boundary are more likely to be approved.

23. Proposals outside the settlement boundary but well- related to an existing settlement may well be approved under the unmet need test because EHDC cannot currently demonstrate a five-year supply. Sites such as further phases of Land East of Horndean may well fall straight into this category,
24. Because land inside the Settlement Policy Boundary is judged far more leniently than land outside it, the Neighbourhood Plan's character area work should pay close attention to exactly where that boundary sits and whether any character areas straddle it. Protected views identified through the plan will carry more planning weight for sites just outside the settlement boundary where the S5 "substantially outweighed" test gives some scope for landscape and visual harm arguments to succeed.

Chapter 5: Meeting the Challenge of Climate Change (coded CC1 to CC3)

25. This chapter sets out expectations for how both plans and individual planning decisions should take climate change into account — reducing carbon emissions, supporting renewable energy schemes, and making sure new development is resilient to a changing climate (for example, not making flood risk worse).

Chapter 6: Delivering a Sufficient Supply of Homes (coded HO1 to HO13)

26. This chapter contains the detailed machinery behind the headline housing policy in Chapter 4. The stated objective of the policies is to support the delivery of a substantial increase in the supply of homes and travellers' sites.
27. It includes planning for an appropriate mix of accommodation for the local community and ensuring land with planning permission is developed without unnecessary delay.
28. With Annex D it sets out the "standard method" formula to calculate annual housing need, as well as the detailed rules for calculating the five-year housing land supply and the Housing Delivery Test. As mentioned earlier, the unmet need is determined from these calculations.

What It Means for Horndean

29. We can expect to see more applications referred from EHDC. We can't reduce or avoid the housing numbers this chapter generates for the district, but the parish may wish to consider whether identifying its own preferred, character-appropriate housing sites (informed by the character area work) is more advantageous than waiting for sites to be imposed.

Chapter 7: Building a Strong, Effective Economy (coded E1 to E4)

30. This chapter deals with protecting and providing land for businesses, industrial premises, freight and logistics facilities, and supporting rural economic diversification (for example, converting farm buildings into small business units).

What It Means for Horndean

31. Fairly limited direct relevance to most residents' concerns, but it could matter if a landowner in the parish wanted to diversify agricultural land into rural business use, or if there were proposals affecting existing employment sites in or near the village.

Chapter 8: Ensuring the Vitality of Town Centres (coded TC1 to TC4)

32. This chapter protects the health of town and city centres by requiring new retail development to be tested against existing centres first (the "sequential test"), so that shops and services aren't drawn away from established centres to out-of-town locations.

What It Means for Horndean

33. Very low relevance. Horndean Parish's shopping area is a village-scale local centre, not the kind of strategic town centre this chapter is really designed to protect. This chapter is unlikely to be a live issue in any Horndean Parish case.

Chapter 9: Supporting High-Quality Communications (coded CO1 to CO2)

34. This chapter supports the rollout of digital infrastructure — broadband cabinets, fibre connections, and telecommunications masts — while managing their visual and environmental impact.

What It Means for Horndean

35. Only likely to come up occasionally, for example if a mobile phone mast or broadband cabinet application is submitted somewhere in the parish. Not a strategic issue for the parish as a whole.
36. Could be relevant in a narrow sense: if the character area and protected views work identifies specific sensitive viewpoints, the Neighbourhood Plan could flag those as locations where siting a mast should be handled particularly carefully.

Chapter 10: Securing Clean Energy and Water (coded W1 to W4)

37. This chapter covers renewable and low-carbon energy schemes, plus the capacity of water supply and wastewater (sewage) infrastructure to support new development. Substantial weight will be given to the benefits of providing capacity to serve new developments or existing users.

What It Means for Horndean

38. Many villages in Hampshire have known constraints on sewage treatment capacity, and if significant new housing numbers are added to Horndean through the emerging plan process the Neighbourhood Plan may need to flag up the areas where there are known infrastructure capacity questions.

Chapter 11: Facilitating the Sustainable Use of Minerals (coded M1 to M6)

39. This chapter protects mineral resources (such as sand, gravel, or chalk deposits) from being built over, by requiring councils to designate "mineral safeguarding areas".

Chapter 12: Making Effective Use of Land (coded L1 to L3)

40. This chapter encourages development to make efficient use of land, prioritising brownfield (previously developed) land, encouraging appropriate density, and avoiding wasteful low-density development where higher density would be more sustainable. The chapter includes development proposals for residential and mixed-use schemes within reasonable walking distance of a well-connected railway station

What It Means for Horndean

41. Relevant to any brownfield or infill sites within the built-up part of the parish for example, redevelopment of an existing developed plot or a car park.
42. The chapter creates pressure toward higher-density development on any infill or brownfield plots subject to being consistent with the overall street scene and safety issues.
43. Substantial weight will be given to creating additional homes or floor space within settlements by using the airspace above existing residential and commercial premises or sensitive development or redevelopment within existing plots with rules for developments within existing curtilages.
44. Density within character areas may need close attention in the Neighbourhood Plan.

Chapter 13: Protecting Green Belt Land (coded GB1 to GB8)

45. This chapter sets out how Green Belt boundaries are drawn and protected, including the "Grey Belt" which is land that is either previously developed, or doesn't strongly contribute to certain Green Belt purposes, but which can be released for development more easily than land that does still perform a strong Green Belt function. Horndean Parish is not in the Green Belt.

Chapter 14: Achieving Well-Designed Places (coded DP1 to DP4)

46. This chapter sets out the key principles for well-designed areas so that new development responds well to its surroundings rather than being generic or poorly laid out.

What It Means for Horndean

47. This is an important chapter for the Parish Design Statement update and to building a Neighbourhood Plan around defined character areas as it carries real weight with decision-makers and will be a much stronger basis for resisting poor-quality design than an informal objection would be.

Chapter 15: Promoting Sustainable Transport (coded TR1 to TR8)

48. The objective of the policies is to ensure transport considerations are taken into account in preparing Development Plans using a vision-led approach to embed the role that transport infrastructure and choices can play in creating well-designed sustainable, inclusive popular places".

What It Means for Horndean

49. This chapter is very relevant given the well-known pressure on the A3 corridor and the roads running through and around the parish. Any significant new housing proposal within or near the parish boundary is likely to trigger a transport assessment and travel plan. This chapter is the policy basis for scrutinising traffic impact, road safety, and whether the local road network can cope.
50. Development proposals should protect the network of Public Rights of Way and take opportunities to extend, link or improve the quality of existing routes where this enables improved access to green spaces and the countryside or new direct and circular routes and connections between local and long-distance footpaths, bridleways and cycle routes.

Chapter 16: Promoting Healthy Communities (coded HC1 to HC8)

51. This chapter protects community facilities (like halls, health centres, and playing fields), supports the designation of Local Green Space (a strong local protection similar in effect to Green Belt, but usable by ordinary parishes), and manages matters such as hot food takeaway locations near schools (to be refused).
52. Substantial weight would be given to proposals for new or improved community facilities or public service infrastructure that makes a demonstrable contribution towards promoting healthier living, including supporting social interaction in the community.

What It Means for Horndean

53. If Horndean Parish Council wants to protect specific valued open spaces, playing fields, or green areas within the parish from future development, the Local Green Space designation allows for this.
54. Local Green Space designation requires clear evidence that a site is demonstrably special to the local community and reasonably local in character, so the character area assessment and views work now underway will feed directly into building that evidence base.
55. Policy HC6 also specifically names public houses, local shops, places of worship, community halls and cultural venues as places which should not be lost to development unless there is no reasonable prospect of retention. The Neighbourhood Plan could reinforce this by identifying valued local venues explicitly.

Chapter 17: Pollution, Public Protection and Security (coded P1 to P6)

56. This chapter deals with contamination, air and noise pollution, the effect of a new development on neighbouring uses (and vice versa), and public safety considerations.

What It Means for Horndean

57. The chapter is of relevance on an application-by-application basis for protecting neighbours' amenity from noise, light pollution, overlooking or contaminated land issues.

Chapter 18: Managing Flood Risk and Coastal Change (coded F1 to F9)

58. This chapter requires new development to avoid areas of flood risk where possible (the "sequential test"). Where it can't be avoided, to prove there's no reasonably available lower-risk alternative and to include appropriate drainage systems to control flow rates and reduce volumes of run-off eg to use sustainable drainage systems (SuDS).

What It Means for Horndean

59. Flooding risks are a recurring issue for Horndean. The Neighbourhood Plan will be able to identify local roads known to flood and which would be exacerbated by the cumulative effect of new development.

Chapter 19: Conserving and Enhancing the Natural Environment (coded N1 to N6)

60. This chapter covers biodiversity net gain (new development must leave nature measurably better off, not just avoid harm), the protection of nature recovery areas, trees, and the setting of protected landscapes such as National Parks.

What It Means for Horndean

61. The chapter is relevant given the parish's direct relationship with the South Downs National Park. Part of Horndean Parish sits inside the Park as well as some parts of the Parish immediately adjacent to it, so issues will arise relating to the potential impacts of development on the Park's landscape character and wildlife setting.
62. The national policy specifically protects the setting of the National Park so views toward or across the Park boundary are likely to carry particular weight if the Neighbourhood Plan formally identifies and evidences them. The SDNPA strategic policy SD6 in its own Local Plan sets out its own three practical tests to be applied to safeguarding views.
63. This chapter also supports identifying locally valued trees and green corridors as part of the character area assessment, since biodiversity and landscape character are treated as linked considerations.

Chapter 20: Conserving and Enhancing the Historic Environment (coded HE1 to HE10)

64. This chapter protects heritage assets such as listed buildings, conservation areas, and non-designated but locally valued historic features and sets out how planning decisions should weigh any harm to those assets against the benefits of a proposed scheme.

What It Means for Horndean

65. Directly relevant, since Horndean Parish has its own Conservation Areas and Sites of Scientific Interest, as well as listed buildings in the historic village core. Any development affecting those specific areas or buildings would be tested directly against this chapter.
66. The Parish Design Statement update and the character area assessment can identify non-designated heritage assets (buildings or features that matter locally but aren't formally listed) and give them recognised protection through the Neighbourhood Plan.
67. Historic views and the setting of the Conservation Area are also natural candidates for the protected views work, since this chapter treats a heritage

asset's "setting" (the view to, from, and around it) as part of what must be protected, not just the building itself.

The Annexes

The NPPF also has six technical annexes that sit behind the main chapters:

Annex A covers how the transition from the old to the new NPPF works — which rules apply to which decisions and plans depending on timing. This is the annex that confirms the new decision-making policies took effect immediately on 17 August 2026.

Annex B is the glossary — importantly, it now contains the new definition of what counts as a "settlement" for the purposes of the S4/S5 test in Chapter 4. "Settlement: Includes cities, towns, villages and other predominantly built-up areas, including land which is allocated or has permission for development which will form part of the built-up area once the development is complete. This includes areas defined as a settlement in the 113 development plan (whether using defined settlement boundaries or equivalent terms, or criteria for identifying settlement extents where boundaries have yet to be defined). Settlements do not include hamlets and scattered groups of houses located outside predominantly built-up areas, unless specifically defined as a settlement in the development plan. For the purpose of this Framework they also exclude villages which lie within and are defined as part of the Green Belt in the development plan."

Annex C sets out what information must be submitted with an application, such as a planning statement for major schemes.

Annex D contains the detailed housing supply calculation rules referenced in Chapter 6, where the buffer percentages and standard method mechanics live.

Annex E sets out the technical methodology for assessing Green Belt and Grey Belt land (not relevant to Horndean).

Annex F contains detailed technical flood risk guidance supporting Chapter 18.

What They Mean for Horndean

- Annex A is important because it confirms exactly when and how the new rules bite on existing cases
- Annex B is important because of the useful Glossary, in particular, in defining Settlement for the purposes of development within and outside the settlement
- Annex D underpins the housing supply arguments that are currently the single biggest live planning issue affecting the parish.

Appendix 3

CONFIDENTIAL

DC Report for HPC Council Meeting 7th September 2026

Cllr David Evans 1/09/2026

As usual, I am reporting things that have happened at EHDC since my last report on 6th July that affect the Southern Parishes or of general interest.

This report is another long one but there are many things happening that will affect residents and Parish Councils. The Government is being seriously challenged by EHDC Leadership to explain and clarify its various proposals. There are many interlocking changes being touted that are seeking to reduce the role of Councillors and Councils but details and justifications are lacking. Local democracy is being diminished, in my view, and I thought it useful to detail what the Council is doing and why.

1st July – Community Assets Briefing, Rose Room, Petersfield Festival Hall

I attended this meeting at which Cllr Adeel Shah, EHDC Portfolio Holder for Community Development and Engagement, talked to community leaders at our Asset Based Community Development – or ABCD programme event

Harnessing local passion: EHDC launches toolkit to help communities thrive

A new way to help communities help themselves

EHDC has launched a new toolkit that will harness local passion and skills to deliver community-led projects.

Focusing on the assets and ambitions in each area and combing that with the dedication of local people, we have launched a programme that empowers residents to have more control over the issues that matter to them most in their community.

With the council's support, it will allow communities to deliver local solutions to local issues. On Wednesday we met with local leaders to discuss the scheme, called Asset Based Community Development – or ABCD.

We heard from three parishes that have already piloted the programme and unveiled the new toolkit to groups keen to get started in their own areas.

Cllr Adeel Shah, EHDC Portfolio Holder for Community Development and Engagement, said: "We know that people are passionate about where they live. Everyone wants the best for their hometown, for their neighbours, for the communities they live and work in.

"There's already a huge amount of fantastic work going on across East Hampshire in terms of volunteers, charities, facilities, support groups and social clubs – we want to harness that in a way that helps every community learn how to help itself. "Asset Based Community Development is a culture change, where councils move away from 'doing to' their communities, and instead work with them so they can do more for themselves.

"Residents already have the skills, knowledge and passion they need - our role is to help them use it."

Three parishes, Horndean Parish Council, Four Marks Parish Council and Medstead Parish Council, piloted the scheme. By going through the process, exploring the opportunities and discovering the pitfalls, their experiences have been invaluable in helping us forge a toolkit for the communities that will follow.

Our toolkit includes a series of guides giving step by step advice on how to use Asset Based Community Development.

Becky White, Clerk to Horndean Parish Council, said: "Involvement in EHDC's asset mapping pilot has been pivotal for Horndean Parish Council in building relationships with our community partners and being responsive to our residents' needs.

"Working collaboratively, it has allowed us to be more pro-active, taking a 'how can we help' approach. It has also allowed us to empower individuals to effect change in their own locality and join the dots in other areas, igniting bigger sparks of progress with ambitious joint projects now taking shape."

More than 50 delegates from community organisations attended last week's conference. The three main pillars of ABCD are.

Community Asset Mapping - Identifying all the community activity in an area - such as community groups, social prescribers and parish councils - enables them to work together to solve local issues.

Community Asset Transfer - Transferring EHDC assets - such as community halls, parks, nature reserves, to town and parish councils - gives the ownership and operation of valuable facilities to the community.

Community Area Partnerships - Uniting parish councils, public stakeholders and local community groups to work collectively on local priorities.

After the launch, Cllr Shah emphasised how important this work will be ahead of Local Government Reorganisation, which will see EHDC dissolved and replaced by a much larger unitary council.

He said: "Due to the sheer scale of the new unitaries there could be a gap between the new councils and the communities they serve.

"An ABCD approach ensures community priorities are not lost and that they are ready to do more for themselves."

Community organisations who want to find out more about Asset Based Community Development can get in touch with the community team at community@easthants.gov.uk

8th July Earlier bin collections from tomorrow to ensure that our crews stay safe in the prolonged hot weather, they will be starting work earlier in the morning until further notice.

9th July EHDC Cabinet approved a new Air Quality Strategy for 2026-31.

East Hampshire's air quality is generally good and within current UK legal limits. However, evidence shows that long-term exposure to air pollution continues to affect residents' lives, particularly people who are very young, old or have medical conditions.

As part of legislation, we have to publish an Air Quality Strategy to identify areas where air quality can be improved and highlight the importance of air quality to residents.

The strategy focuses on four priority areas:

Raising awareness of the importance of air quality

Reducing health inequalities – so people aren't disadvantaged by where they live

Reducing emissions

Improving the understanding of the impacts of particulates and indoor air quality.

There will be an annual action plan for air quality which will be monitored regularly.

Councillor Robert Mocatta, East Hampshire District Council portfolio holder for Regeneration and Prosperity (which includes climate and environment), said:

"Air pollution can have a massive impact on people in all stages of their lives, from children developing childhood asthma to older people struggling with breathing issues.

"We're very lucky in East Hampshire that we've got great air quality and very few areas for concern, but it's still important to act where we can, to maintain that situation and protect our most vulnerable residents.

"There are many things that impact air quality and there are many things we can all do - from switching car engines off when idling, walking where possible to school, to checking our own indoor air quality at home. The work we'll be doing because of this strategy will help raise awareness of air quality across the district."

10th July Cabinet approves £3.5 million investment in local projects

New homes fund new infrastructure in East Hampshire

East Hampshire District Council has announced more than £3.5 million is to be spent on facilities, projects and infrastructure.

Last night, the council's Cabinet approved financial support for 28 fantastic schemes that will improve the lives of tens of thousands of local residents.

The list includes extending doctors' surgeries and dental practices, brand new playgrounds and sports pitches, facilities for local schools, support for families in need, renovations for village halls and help for pre-schoolers and pensioners.

The money is drawn from housebuilding taking place in parts of East Hampshire outside the South Downs National Park and is used to mitigate the impact of development on local communities.

Alton Dental CIL 2

WBLC blinds 2 crop

CIL Bohunt 3GAstro Ribbon - small

CIL award Headley

Some of the fantastic community projects supported by developer contributions in the past include (clockwise from top left) Alton Dental Practice, a new 3G pitch in Liphook, improvements to Whitehill & Bordon Leisure Centre and a refurbished pavilion in Headley

Cllr Robert Mocatta, EHDC Portfolio Holder for Regeneration and Prosperity, said: "This fantastic funding and the brilliant projects it supports is made possible by the development we see in the district.

"Delivering new homes is an important duty and a Government priority that we must meet, but more homes means a greater demand on public services and local amenities. That's why it is so important to use these developer contributions to improve infrastructure.

"It's important to allocate these funds from existing developments rather than leave the developer's contributions unspent on the council balance sheet."

Cllr Angela Glass, EHDC Portfolio Holder for Regulation and Enforcement, said: "Development brings opportunities to enhance the facilities and services that residents rely on, helping to ensure our communities remain vibrant, well-connected and well-served.

"It's great to see these contributions being put to work on projects that will make a real difference to people's daily lives. Whether improving educational provision, supporting healthcare services or enhancing community facilities, this funding ensures that growth delivers tangible benefits for both current and future residents."

Cllr Andy Tree, EHDC Deputy Leader, is Portfolio Holder for Whitehill Bordon Area, and manages developer contributions for that area. He said: "I am delighted as always to have agreed the successful Whitehill, Bordon and Lindford applications and look forward to seeing these developer contributions benefit our local community.

"Health is a number one priority and so the funding the extend Pinehill Surgery will be of great benefit to residents."

The community projects sharing £3.5 million

Whitehill Town Council - £75,566.40 for a new multi-use games area at Mill Chase Recreational Ground
Clanfield Junior School - £44,784 for the Big Play Project
Pinehill Surgey - £220,350.26 to extend the surgery
Bentley C of E Primary School - £22,500 for an early years foundation stage canopy
Wield Village Hall - £20,000 to refurbish the village hall roof
Rowledge C of E Primary School, Binsted - £166,912 for a new community hub
The Ark Preschool, Bramshott & Liphook - £10,000 to extend the playground
Ropley Cricket Club - £25,000 for replacement cricket nets
Grayshott and Hindhead Institute Village Hall - £20,000 for a heating system refurbishment
St John's Church, Rowlands Castle - £41,798.79 to refurbish kitchen facilities
Dementia Friendly Alton - £53,525 for a minibus service
The Holme Church of England Primary School, Headley - £64,000 for on-site nursery
Whitehill Town Council - £85,510.88 for a replacement boardwalk in Bordon Inclosure
Grayshott C of E Primary School - £9,900 for an outdoor theatre and classroom
Bushy Leaze Children & Family Centre - £90,000 to extend services
Amery Hill School - £362,625 to resurfacing all-weather pitch and floodlights
Ropley C of E Primary School - £55,500 for a SenCo area
Alton Dental - £175,000 to provide additional practice rooms
Ropley C of E Primary School - £100,000 to expand the swimming pool and enable community use
Alton Town Council - £375,000 for a 3G pitch at Anstey Park
EHDC - £500,000 for an indoor aquatic adventure zone at Whitehill & Bordon Leisure Centre
Alton Tennis Club - £312,856 for an indoor tennis canopy
Horndean Technology College - £312,000 for updated community changing rooms and accessible toilets
Oakmoor School, Whitehill - £157,000 for outdoor communal seating
New Blendworth Centre, Horndean - £200,000 to rebuild and modernise the centre
St Mary's Bentworth School - £35,835.49 for a community garden and walking track
Hidden Valley, Grayshott - £25,000 for an outdoor classroom

The total amount allocated = £3,572,663.82!

10th July Planning application ref EHDC-26-0722-EIA: EIA [Environmental Impact Assessment] Screening Opinion re: LAND AND BUILDING ON THE SOUTH SIDE OF White Dirt Lane, Horndean, Waterlooville, Hampshire. Horndean Catherington, Horndean CP

Application Proposal: Pursuant to Regulation 6, a Screening Opinion - Residential development for up to 150 dwellings including affordable housing, creation of internal street network, including

pedestrian and cycle routes, Redevelopment of existing access from Southdown Road to the east, public open space, green infrastructure and drainage infrastructure.

Decided 25th August : No EIA is required

We can therefore expect an Application to come forward for this site along the lines quoted above.

Many will recall that this site was the subject of a similar application, some years ago, which EHDC, District and Parish Councillors and the public vigorously opposed and which was eventually refused. The Labour Government has virtually doubled our housing target making the vital criterion of maintaining a "Five Year Housing Supply" (5YHLS) out of reach at the moment. The other changes to the Planning system including the new NPPF published on 17th August will have to be considered.

15th July Government guidance on Local Plans needed now – EHDC Leader

Cllr Millard calls on Government to deliver on overdue promise

East Hampshire District Council Leader, Cllr Richard Millard, has urged the Government to provide guidance now, 'not at some unspecified point in the future', if councils are to prepare Local Plans ahead of Local Government Reorganisation (LGR).

In May EHDC announced that a series of confusing and contradictory changes to planning rules and the prospect of new council areas after LGR had forced us to change direction and refocus our work on our Local Plan.

The Government has been slow to recognise the issue and said it would provide guidance on the matter, but councils are still waiting.

This week, EHDC Leader, Cllr Richard Millard, has written to Housing Minister Alison McGovern MP asking for the much-needed guidance, saying councils are making big decisions now and can't wait while the Government sorts itself out.

He said: "Councils are expected to continue delivering ambitious planning programmes while simultaneously restructuring local government, adapting to new legislation, preparing for new plan-making procedures and awaiting guidance that has yet to materialise.

"As Leader of the council, I concluded that continuing under the previous timetable was no longer a responsible use of public resources. Instead, our planning officers are now working towards plan-making under the new system, with the intention of publishing our notice to commence before the end of the year.

"That decision has been forced - not by any lack of commitment from this council, its officers or local communities - but by the uncertainty arising directly from the Government's own programme of overlapping and incomplete reforms."

Cllr Millard believes that the combination of changes to planning rules and the introduction of a new planning policy system while simultaneously undergoing the biggest shake-up of local government in 50 years has fundamentally changed the planning landscape.

The Government has promised that councils will receive guidance on how to prepare Local Plans in the face of these competing pressures 'in due course'.

Cllr Millard states: "That is no longer sufficient. Councils cannot continue to operate on the basis of assurances that guidance will appear at some unspecified point in the future.

"Councils are making decisions now on staffing, procurement, evidence gathering, budgets and programme management."

The letter raises three main concerns:

Duty to prepare Local Plans: Does the Government expect councils to continue spending significant public funds on Local Plans for authorities that will cease to exist in 2028?

Geography: How should East Hampshire prepare a Local Plan when the district will be split between two new councils, potentially rendering current planning work obsolete?

Transitional arrangements: Councils need urgent guidance now. Without clear transitional arrangements, they are making major decisions on budgets, staffing and planning in a vacuum, risking delays, wasted resources and missed Government targets.

While reaffirming EHDC's commitment to housing delivery, economic growth and maintaining an up-to-date planning framework, Cllr Millard urged the Government to provide immediate guidance and greater policy certainty.

He asks ministers to urgently answer the council's questions and confirm when comprehensive transitional arrangements will be published.

21st July EHDC supports the challenge to Government's reorganisation decision

East Hampshire District Council has backed efforts to secure greater clarity and transparency about the Government's controversial local government reorganisation decision for Hampshire and the Solent.

The council has written a letter of support to Hampshire County Council following its decision to pursue a judicial review of the Government's chosen model for local government reorganisation.

East Hampshire District Council was a partner in the development of the four-unitary proposal that was submitted for consideration.

The council notes that advice provided to Ministers reportedly recommended the four-unitary option, making the Government's decision to adopt an alternative approach a matter of significant interest to local authorities and residents alike.

Councillor Richard Millard, Leader of East Hampshire District Council, said: "EHDC shares the concerns raised by Hampshire County Council regarding both the process followed and the reasoning that underpins the Secretary of State's decision.

"We strongly believe that Ministers are accountable for their decisions and the refusal to give proper reasons creates the requirement for these matters to be fully examined by the court and so we support the County Council's efforts to seek legal clarity through the judicial review process.

"The decision on local government reorganisation will have long-term implications for residents, communities and public services across Hampshire.

"Given the significance of this decision, it is important that there is a clear understanding of how the final outcome was reached and the reasons for departing from the proposal reportedly recommended by officials.

"As a council that worked closely with partners to develop the four-unitary proposal, we believe it is reasonable to seek further clarity and assurance that the decision-making process has been robust, evidence-based and transparent.

"While we remain committed to working constructively with partners across Hampshire as reorganisation progresses, we recognise the importance of ensuring that decisions of this scale can be properly scrutinised."

East Hampshire District Council will continue to engage constructively with local authority partners throughout the reorganisation process and remains focused on securing the best outcomes for local residents and communities.

EHDC is not a claimant, defendant or formal party to the proceedings and will not be directly involved in the litigation.

29th July A year of great achievements for East Hampshire District Council

East Hampshire District Council (EHDC) has improved people's lives while continuing to deliver high-quality services over the last year.

The 2025-26 financial year saw improved business rates collection (97.6%) and the usual high level of council tax collection at 98.2% - outstripping the national average of 95.6%.

High collection rates help keep everyone's council tax down – if everyone pays, everyone pays less.

Our residents are our top priority, this year the vast majority of people who have contacted our customer service team have also been happy with the help they've received, with a rise to 96% satisfaction.

Despite working in an ever-changing system, our Planning team was able to decide 100% of major applications within 13 weeks (or agreed extension) and 85% of minor applications in the same timescale.

We've also made major strides in a host of other vital areas:

Providing training and 1-1 support for 29 small businesses in the area.

Supporting the delivery of 257 new affordable homes with £545,000 approved to help deliver seven new shared equity homes in Medstead.

Distributing £792,000 of funding through grants schemes (Councillor Grants, Grow Up! and the Community Climate Action Fund)

Reducing our energy use and costs at Monterey House, producing 152,991kWh of power and saving approximately 27 tonnes of carbon dioxide.

Working with Hampshire County Council to produce a well-crafted, evidenced, and detailed proposal Local Government Reorganisation and engage residents on it.

Councillor Richard Millard, Leader of EHDC, said: "Our progress over the last year has been incredible and is down to the dedication and commitment of our staff and councillors.

"By working together with our shared purpose of environmental sustainability, economic growth and prosperity, thriving communities and a modern and efficient council, we continue to achieve great things."

5th August

(Although the proposed Mid-Hants Unitary will not include Horndean our decision to halt expensive and nugatory work on a Local Plan that will save money for Horndean residents before April 228)

We said that persisting with a local plan using old rules and outgoing boundaries was unjustifiable. Since then New Forest District Council Winchester City Council and Test Valley Borough Council have all announced that they too will focus their plan making on the new system.

Cllr Richard Millard, EHDC Leader, said: "We believe it is right to focus our planning work on the new planning system, while preparing for the new council areas that will be introduced in 2028, rather than continue spending money on plans that will soon become redundant.

"Without clear Government guidance on how reorganising councils should prepare plans for areas that will soon disappear, it makes sense to look ahead and work collaboratively on arrangements for the future. We are still waiting for the Government's promised guidance.

"It is pleasing to see other councils taking a similar approach and focusing on the future."

7th August Our priorities for the new PM

Cllr Millard lays out what should be top of Andy Burnham's to-do list

New Prime Minister Andy Burnham may only just have moved in to Number 10, but according to EHDC Leader Cllr Richard Millard, his to-do list is already overflowing with issues affecting East Hampshire.

Rather than leave him guessing where to start, Cllr Millard has written to the Prime Minister setting out a few suggestions.

From housing targets and local plans, to business rates and local government reorganisation – EHDC and other local authorities are grappling with challenges that previous governments have failed address.

In a letter sent this week, Cllr Millard highlighted the most pressing tasks on Mr Burnham's to-do list if he really wants to 'rewire the nation'.

Letter to Andy Burnham PM:

Andy's East Hampshire in-tray

Rethink housing targets

East Hampshire's housing numbers have effectively doubled since 2024. More than half of the district lies within the South Downs National Park (57%) yet the housing target does not reflect this.

EHDC has acknowledged the need for sustainable housing growth, especially affordable housing, but housing targets must recognise East Hampshire's exceptional circumstances.

Give us guidance on local plans and LGR

There is uncertainty around the status of local plans ahead of local government reorganisation (LGR).

Preparing plans for councils that will cease to exist risks wasting money and time. We have called for guidance on how local plans can be prepared in the light of LGR, but, so far, none has been forthcoming.

Assurances on water availability

We are increasingly concerned about water infrastructure capacity in the north of the district. South East Water has made it clear that water resources across parts of East Hampshire are not expected to keep pace with planned growth. Existing residents are already concerned that more development will compromise their own water supply. We need the government to work with the water industry to provide clarity on capacity and provide the infrastructure required to allow for the development they demand.

Tougher powers for planning enforcement

Councils need more powers to tackle unauthorised development quickly and effectively. Lengthy legal procedures leave councils ill-equipped to deal with breaches of planning control. We have called for strengthened planning enforcement powers and greater support for councils undertaking this work. The new Prime Minister is now in a position to do this.

More support for local government reorganisation

We are working hard to deliver the government's objectives for local government reorganisation. We understand that the option chosen differs from that recommended by officials, but what is particularly concerning is the fact that East Hampshire will be split between two new authorities. Separating services poses the risk of unintended impacts on vulnerable residents and operational and financial challenges for the council.

The unprecedented complexity of Hampshire's reorganisation should be recognised with extra government support.

Bring forward business rates relief

We have already warned the government about the potentially crippling impact the three yearly rate revaluation will have on local businesses. Given the acute nature of the challenges faced by pubs and live music venues you must bring forward the 20% rate relief planned for 2026-27, in addition to the 15% already announced. A business rate reduction of 35% over the next three years will go some way to saving businesses from the brink.

We also fully support the current national campaign to reduce hospitality VAT from 20% to 10% and ask you to implement this change urgently to ensure the industry is taxed fairly and in line with Europe.

It's time to deliver

Cllr Millard said: "Successive governments have failed to deliver on these important issues for East Hampshire.

"Now Andy Burnham is in power he has the chance to change the record and make a real difference to our residents.

"He claims he will be more collaborative with local leaders as he strives to 'rewire the nation' - this is his chance to show us he is serious and give East Hampshire the support it needs to tackle these ongoing challenges."

12th August 'Cut out the confusion and bring us some clarity' - EHDC Leader tells Angela Rayner

Cllr Millard calls for clear guidance on local plans and government reorganisation

Cut out the confusion and bring us some clarity – that's the challenge from EHDC Leader Cllr Richard Millard to Angela Rayner MP on her return to Government.

Cllr Millard has called for urgent action on the issues blighting housing delivery and planning in a letter welcoming Angela Rayner back to her role as Secretary of State for Housing, Communities and Local Government.

Councils' planning teams have been left struggling with a wave of confusing and counterproductive changes to planning policies while local government reorganisation promises to change the landscape for local authorities in Hampshire in the next two years.

Cllr Millard writes: "If your first act could be to replace uncertainty with clarity, confusion with consistency, and unrealistic housing targets with deliverable ones, local authorities and the communities they serve would be genuinely grateful."

See Cllr Millard's letter to Angela Raynor MP

In May, EHDC announced that we would not submit a local plan by the Government's deadline of 31 December 2026, and instead, we would move to the new system.

The announcement came after sweeping government changes to how local plans are made - and ahead of a reorganisation of local government that will make new councils covering new areas.

We said that persisting with a local plan using old rules and outgoing boundaries was unjustifiable. Since then, more councils have followed suit, choosing to focus their plan-making efforts on new planning methods rather than the legacy systems.

The Government has promised guidance to councils on how to develop local plans in the face of local government reorganisation, but that guidance has not yet come through.

Cllr Millard said: "The government's handling of planning policy, particularly with respect to local plans and LGR, has resulted in confusion and frustration for councils and residents.

"Angela Rayner's first job must be to sort out the extraordinary muddle they have made of LGR and local plans. It's evident to everyone that little thought has been given to how these radical changes to local government would affect the preparation of local plans.

"East Hampshire District Council acknowledges the need for housing growth but plan-led development depends on certainty, evidence and infrastructure – all of which are sadly missing from government policy at the moment.

"Councils such as East Hampshire stand ready to play their part in delivering the homes the country needs, but that can only be achieved through a stable, plan-led system underpinned by the infrastructure necessary to support sustainable growth."

14th August The Future Hampshire programme

The Future Hampshire programme has been working together since March. This is the Hampshire-wide programme coordinating the implementation of local government reorganisation across the county, and a new website has been created to provide information on this work.

Developed collaboratively by councils across Hampshire, the website has been created to support the Future Hampshire programme and provide a shared source of information on local government reorganisation. It will serve as a central hub for programme updates, key documents and resources, helping councillors, partners and stakeholders stay informed and engaged as this work progresses.

The website explains:

- why local government is changing
- what the future council arrangements will look like
- key programme milestones and timescales
- what the changes mean for residents, businesses, partners and communities
- how councils are working together to deliver the transition – including governance arrangements and decision-making

While preparations for the future councils are underway, current council services continue as normal and residents, businesses and communities should continue to access services through their existing councils.

The programme will continue through to April 2028, when the new councils are expected to assume responsibility for local government services across Hampshire.

To find out more, please visit the Future Hampshire website: www.futurehampshire.gov.uk

17th August EHDC Leader wants action on business rates and VAT relief for hospitality sector

The Leader of East Hampshire District Council, Councillor Richard Millard, has written to the Chancellor calling for urgent support for pubs, live music venues and hospitality businesses facing mounting financial pressures and rising business rates.

Cllr Millard has urged John Healey MP to act, warning that the latest business rates revaluation is placing even greater pressure on businesses already battling rising operating costs, economic uncertainty and tough trading conditions.

He argues that many are being pushed "to the brink" and need immediate support to survive.

Read our letter to the Chancellor

While welcoming the Government's announced 15% business rates relief for pubs and live music venues in 2026-27, alongside transitional relief measures, Cllr Millard is calling for a further 20% relief planned for 2027-28 to be brought forward and applied from next year.

The proposal would provide a combined 35% reduction in business rates, offering much-needed breathing space for venues and hospitality businesses facing increasing financial pressures.

Councillor Richard Millard, Leader of East Hampshire District Council, said: "Our pubs, live music venues and hospitality businesses are at the heart of our communities, but many are facing incredibly difficult trading conditions.

"The business rates revaluation has disproportionately affected sectors that are already under pressure from rising costs and economic uncertainty. Without further support, some businesses risk being pushed to the brink.

"Bringing forward the proposed 20% rates relief, on top of the 15% already announced, would provide meaningful help and give businesses a better chance of surviving and investing in their future.

"We are also supporting calls for hospitality VAT to be reduced from 20% to 10%, helping create a fairer and more sustainable environment for one of the UK's most important sectors."

In the letter, Cllr Millard stresses that these measures should be viewed as the beginning of wider reforms needed to reduce the burden on businesses, boost confidence and support long-term economic growth. He argues that a thriving small business community is essential to the future prosperity of both East Hampshire and the wider UK economy.

25th August Unauthorised Traveller Site at Land east of New Barn Farm Lane, Blendworth
The appeal is dismissed against the Enforcement Notice Issued by the Council to:

1) Discontinue the residential use of the land;
2) Remove all caravans and motor home(s) from the land;
3) Discontinue the use of the stable building, outlined in blue in the approximate position shown on the attached plan, and remove from within it all domestic, personal and residential items, including white appliances, furnishings, sink(s), shower tray and associated plumbing;
4) Break up the hard surface area hatched black in the approximate position shown on the attached plan;
5) On completion of step 4) above remove all resulting debris from the land including hard core, aggregates, stones, and membrane fabric from the area hatched black marked in the approximate position on the attached plan;
6) On completion of steps 1) to 4) restore the land to grassed paddock.

The Inspector has extended the compliance period from 8 to 12 months

In the light of recent incidents of unauthorised development if you witness activity that raises concerns of a possible breach of planning control, please complete the Planning Enforcement Enquiry and Complaint Form available on the Council's website: Planning Enforcement Enquiry and Complaint Form.
For urgent situations that require an immediate response, please contact a Councillor who can report it immediately by calling the Council and connect to the out-of-hours enforcement officer, who can assess reports, investigate potential planning breaches and take any necessary action.

Appendix 4

CONFIDENTIAL

District Councillor Report for HPC Council Meeting – 30 September 2025

Cllr James Hogan – Horndean Downs ward
Cllr Elaine Woodard – Horndean Murray ward

Food Wast Collection

Caddy packs are being delivered in advance of the new food waste collection service, which begins in October. We've been asked to pass on the message 'Please don't use your caddies yet!'

Collection days will be available on the EHDC website from 21 September. Residents should start putting their caddies out from the week of their first scheduled collection.

Each caddy pack includes an instruction leaflet explaining how the service works. For more information, visit www.easthants.gov.uk/food-waste or the East Hsmpshire District council Facebook page.

Future Hampshire

The Future Hampshire programme has been working together since March. This is the Hampshire-wide programme coordinating the implementation of local government reorganisation across the county. A new website www.futurehampshire.gov.uk has been created to provide information on this work.

Cllr Woodard to be the EHDC representative on the Joint committee for the SE Hampshire Unitary

The South East Hampshire Unitary Joint Committee is the interim body overseeing preparations for the creation of the new South East Hampshire Council, which is due to become operational in April 2028. Its membership includes representatives from Portsmouth, Hampshire County Council and the affected district and borough councils, including East Hampshire. The Committee will coordinate the transition of services, assets and responsibilities until the elected Shadow Authority takes over following the May 2027 elections.

Cllr Elaine Woodard has been chosen as the EHDC representative on the joint committee for the SE Hampshire Unitary.

Land south of White Dirt Lane, Horndean

This part of the report has been compiled by Cllr Hogan from details gathered as part of case work due to requests for information from residents.

1. EIA Screening Opinion

East Hampshire District Council received a request for an Environmental Impact Assessment (EIA) Screening Opinion, reference EHDC-26-0722-EIA, relating to potential residential development of up to 150 dwellings on land south of White Dirt Lane, Horndean.

An EIA Screening Opinion is not a planning application. Its purpose is to determine whether a future planning application would need to be accompanied by a formal Environmental Statement under the Environmental Impact Assessment Regulations.

EHDC issued its decision on 25 August 2026 and concluded that a formal EIA is not required. The Council considered that, although the proposal falls within Schedule 2 of the EIA Regulations, it was not likely to have significant environmental effects at the level that would require a formal EIA.

Importantly, this does not mean that environmental or planning matters will not be considered. The officer's report explains that the potential effects are not considered significant in EIA terms, but that matters such as landscape, ecology, traffic and transport, drainage, air quality, noise and agricultural land would still need to be assessed through the normal planning application process if an application is submitted.

2. Previous planning history – in 2014 for 135 Dwellings

In 2014, an EIA Screening Opinion was also sought and EHDC similarly concluded that a formal EIA was not required.

Following that a planning application (EHDC ref 26152/002) was submitted for the site for up to 135 dwellings, including affordable housing, access, parking, open space, and landscaping. That application was refused on 30 December 2014.

3. Likely future planning application

Following enquiries from residents Cllr Hogan contacted the developer's planning agent to ask for an indication of the likely timetable and whether a public consultation was planned.

The agent has advised:

"We are currently progressing the technical work required to support the proposals and anticipate undertaking a public consultation exercise during Q4 2026. This will provide an opportunity for local residents and stakeholders to review the emerging proposals and provide feedback.

Following the consultation, we will review the comments received and, where appropriate, seek to reflect these within the proposals before progressing to submission shortly thereafter."

Horndean Parish Council

Speed Device(s) Update For August 2026

Speed Indicator Devices (SID)s

The locations of the three SIDs for August were Lovedean Lane (Southbound at The Curve), White Dirt Lane (leaving Clanfield village) and Rowlands Castle Road (towards Havant Road). My thanks to the Grounds Team again! We will seek to put some of this one Social Media in September. We may have a battery or connection issue with the original SID – we are monitoring.

Key data for Lovedean Lane LP42 w/c 10/08/2026

- An average of 2300 vehicles per day (over 13700 vehicles in 6 days*).
- **Highest Speed 60mph** (23:20 on 11/08), 3 instances of 50-55, 38 instances of 45-50mph.
- **45%** of vehicles are speeding and **11%** speed more than the police ticket threshold (35 mph).
- Worst times are 0900-1000 and 1600-1800 No School Run!
- *Please note the SID battery failed early hours of Sunday 16th – so this is just 6 days data

Key data for Rowlands Castle Road LP5 w/c 10/08/2026

- An average of 2000 vehicles per day (over 13600 vehicles in a week).
- **Highest Speed 50mph** (05:25 on 15/08), 26 instances or 40-45mph
- **12%** of vehicles are speeding and **1.5%** speed more than the police ticket threshold (35 mph).
- Worst times are 0700-0800 and 1600-1700 ie work commute

Key data for White Dirt Lane LP8 w/c 10/08/2026

- An average of 1600 vehicles per day (over 11000 vehicles in a week).
- **Highest Speed 50mph** (17:10 on 14/08), 3 instances of 45-50 mph, 37 instances of 40-45mph).
- **20%** of vehicles are speeding and **2.9%** speed more than the police ticket threshold (35 mph).
- Worst times are 0700-0800 and 1700-1800 ie work commute

Speed Device(s) Update For July 2026

Speed Indicator Devices (SID)s

The locations of the three SIDs for July are Catherington Lane (towards Stonechat), Havant Road (towards the village) and Downhouse Road (travelling South – our first 40 mph zone with a SID). My thanks to the Grounds Team again! We will seek to put some of this one Social Media in August.

Key data for Catherington Lane LP38 w/c 13/07/2026

- An average of 2100 vehicles per day (over 14000 vehicles in a week).
- Highest Speed 60mph (6.10am on 13/07), 5 instances of 55-60, 16 instances of 50-55mph and 50 instances of 45-50mph.
- **46%** of vehicles are speeding and **13.7%** speed more than the police ticket threshold (35 mph).
- Worst times are 0800-0900 and 1500-1700 ie School Run!

Key data for Downhouse Road LP3 w/c 13/07/2026 (40MPH)

- An average of 2600 vehicles per day (over 17000 vehicles in a week).
- **Highest Speed 75mph** (06:15 on 16/07), 3 instances or 70-75mph). 4 instances of 65-70mph, 20 instances 60-65mph.
- **21%** of vehicles are speeding and 5.2% speed more than the police ticket threshold (46 mph).
- Worst times are 0700-0800 and 1600-1800 ie work commute

Key data for Havant Road Lane LP10 w/c 13/07/2026

- An average of 5000 vehicles per day (over 34000 vehicles in a week).
- Highest Speed 60mph (16:30 on 16/07), 2 instances of 55-60 mph, 11 instances of 50-55mph). 32 instances of 45-50mph.
- **25%** of vehicles are speeding and 4.7% speed more than the police ticket threshold (35 mph).
- Worst times are 0700-0900 and 1600-1800 ie work commute
